

Yi Hong Li (Jason)

plush toys, 2015

Made: Wool, plush, needlework,
plastics.

Dimensions Variable:
(300 mm) —

I have chosen a collection of my life that has profound influence and full of good memories - plush toys, it has always been my favorite collection and there are many channels to get them, such as from my nephew and little brother they are tired of plush Toys or duty free shops at the airport. Just see my favorite plush toys I will collect them. This is derived from my 5-year-old birthday that year, my mother gave me the first pure wool production of handmade plush toys. I love it and I keep it until the age of 10 ... but when I was ten years old when we moved the family, I lost it. Since then, in order to make up for this fault I began to collect some plush toys from that year, today, the number of collections more and more, they have

become my partner and I can never forget the childhood is also inseparable Part of the memories.

I can not bring the collection because they are easy to dirty and some plush toys will be discolored in the wet space, the quality deteriorated. So I chose to bring some photos and install the label in the cabinets I think fit. First of all my photo color is rich because they are bright clothes or white body, it is not easy when I find the right place, simply I put the inside of the cabinet above, I use the pushpin to nail the picture above, In the bottom of my picture belongs to Mickel up to the robot collection, which is the only thing I can find with my collection match the picture. (We collect the items are close to the white main colors) Of course, if I have the opportunity to re-do it I will certainly print out my label this will be more standard, font, line spacing will be reflected.
